

# List of ISBT 128 Standards

Tuesday, November 27, 2018

| Publication Number | Publication Title                                                                                                                                                    | Active Version | Date Issued |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|-------------|
| IG-002             | United States Consensus Standard for the Uniform Labeling of Blood and Blood Components Using ISBT 128                                                               | 3.0.0          | Mar 2013    |
| IG-003             | United States Consensus Guidance for the Uniform Labeling of Cellular Therapy Products Using ISBT 128                                                                | 1.3.1          | Mar 2015    |
| IG-008             | Technical Bulletin 5: Bar Code Scanner Implementation of ISBT 128 Concatenation                                                                                      | 1              | May 2002    |
| IG-010             | Implementation Guide: Use of Flags in the Donation Identification Number for Process Control of Critical Points During Processing and Distribution                   | 1.0.2          | May 2017    |
| IG-011             | Technical Bulletin 8: Specification for ISBT 128 Data Structures to support the secure bedside matching of patient and transfusion/transplant product identification | 1.0.0          | Jan 2006    |
| IG-013             | Implementation Guide: ISBT 128 Bar Codes: Valid and Invalid Examples                                                                                                 | 1.1.0          | Sep 2017    |
| IG-014             | Implementation Guide: Use of Data Matrix Symbols with ISBT 128                                                                                                       | 1.3.0          | Sep 2016    |
| IG-015             | Implementation Guide: Use of the Manufacturers Data File                                                                                                             | 1.2.1          | Dec 2016    |
| IG-017             | Implementation Guide: Length of the Product Code Bar Code and Concatenation                                                                                          | 1.1.0          | Aug 2017    |
| IG-019             | Implementation Guide: Manufacturer's Catalog Number and Lot Number (NOT Containers)                                                                                  | 1.0.1          | May 2017    |
| IG-020             | Implementation Guide: Encoding Product Information [Data Structures 003, 032, 033, and 034] - Tissues                                                                | 2.0.0          | Apr 2015    |
| IG-021             | Implementation Guide: Use of Product Code [Data Structure 003] - Blood                                                                                               | 1.1.0          | Apr 2015    |
| IG-022             | Implementation Guide: Product Coding [Data Structures 003 and 032] - Cellular Therapy                                                                                | 1.2.0          | Apr 2015    |
| IG-023             | Implementation Guide: Use of Product Divisions [Data Structure 032]                                                                                                  | 1.2.0          | Nov 2018    |
| IG-024             | Implementation Guide: Use of Flexible Date and Time [Data Structure 031]                                                                                             | 1.1.0          | Jul 2016    |
| IG-025             | Implementation Guide: US Guidance on Printing Text Associated with Red Cell Antigens                                                                                 | 1.0.0          | Mar 2015    |
| IG-026             | Implementation Guide: Use of Dimensions [Data Structure 029]                                                                                                         | 1.2.0          | Jul 2016    |
| IG-027             | Implementation Guide: Use of Red Cell Antigens with Test History [Data Structure 030]                                                                                | 1.2.0          | Jul 2016    |
| IG-028             | Implementation Guide: Use of ISBT 128 by North American Tissue Banks                                                                                                 | 1.3.0          | Mar 2015    |

| Publication Number | Publication Title                                                                          | Active Version | Date Issued |
|--------------------|--------------------------------------------------------------------------------------------|----------------|-------------|
| IG-029             | Implementation Guide: Choosing an On-Demand Label Printer                                  | 1.0.1          | May 2014    |
| IG-031             | Implementation Guide: Use of the Processing Facility Information Code [Data Structure 033] | 1.1.0          | Sep 2016    |
| IG-032             | Implementation Guide: Use of Product Code [Data Structure 003] - Ocular Tissue             | 1.2.0          | Nov 2016    |
| IG-033             | Implementation Guide: Use of the Donation Identification Number [Data Structure 001]       | 1.2.0          | Nov 2017    |
| IG-034             | Implementation Guide: ISBT 128 Facility Identification Number                              | 1.2.0          | Sep 2016    |
| IG-040             | Implementation Guide: Use of ISBT 128 in North American Eye Banks                          | 1.4.0          | Nov 2016    |
| IG-041             | Implementation Guide: ISBT 128 in Resource Limited Countries                               | 1.0.0          | Aug 2016    |
| IG-043             | Implementation Guide: A Validation Tool for ISBT 128 Data Structures                       | 1.1.0          | Nov 2017    |
